

Parkinson's Disease

Research Study Opportunity

- Do you have Parkinson's Disease?
- Are you currently taking L-dopa medication?
- Do you feel your Parkinson's medications wearing off?
- Does how you feel throughout the day both physically and mentally change in response to your medications?

Then you may be eligible to participate in the **NoMoFA** (Non-Motor Fluctuation Assessment) **Study**.

This study requires only **one** visit (approximately 1 hour); involves a brief tutorial about non-movement symptoms related to Parkinson's Disease, followed by answering some questionnaires related to **YOUR** Parkinson's symptoms.

Please talk to your doctor if you are interested, or contact Daniel Harmic at **416-784-3600** (Baycrest Hospital).
